About This Game

Bouncing Odyssey is a logic puzzle game. Quite challenging puzzles and very unusual but attractive hand-drawn graphics (made on paper with PENCIL) are the main characteristics of the game.

Main mechanic is simple. Set your position and direction and, with the use of *the law of reflection*, you must escape the screen and simultaneously decolorize all the colored objects on the screen.

Key features

- 75 challenging and handcrafted levels + one *special final level*

- Four worlds with five different game mechanics:
  - Basic mechanics - **THE LAW OF REFLECTION**
  - **BLACK HOLES** - they influence your trajectory and can absorb you
  - **GRAVITY** - set your own direction of the gravity
  - **MOVING PLATFORMS** - some platforms change their position over time

- Final level mechanics becomes available after finishing all the previous levels

- Unusual style of graphics in every level (made on paper with pencil!)

Title: Bouncing Odyssey
Genre: Casual, Indie
Developer:
BigMouthedDog Studio
Publisher:
Lukáš Kotík
Release Date: 17 Dec, 2017

a09c17d780

2/5

The physics do not feel natural but I have learned to adopt. For $2 the soundtrack and art style of this game can carry it. Grreat job. This game is aesthetically pleasing and ocne you get the hang of it and try the other modes, easily worth $2.
